

NEWSLETTER - VIBHAA HOSPITAL- MARCH 2024

Warm Greetings and Happy Ugadi!

As the new year unfolds, we are greeted with intermittent thunderstorms, offering much-needed respite from the scorching heat. With renewed vigor and enthusiasm, we present the latest edition of the Vibhaa Hospital Newsletter, highlighting our recent endeavors and forthcoming initiatives.

Innovations in Healthcare Services

We are delighted to announce the commencement of **Bronchoscopy services** at Vibhaa Hospital. Renowned Pulmonologist, **Dr. Gururaj Udachankar from Belagavi**, joins our **esteemed team to provide specialized care for respiratory-related illnesses**. His expertise promises enhanced treatment options and improved outcomes for our patients.

Expanding our commitment to comprehensive healthcare, we are proud to introduce Oncological Services at Vibhaa Hospital. Dr. Vishal Kulkarni, an esteemed Oncologist, will conduct his OPD sessions every 2nd Saturday of the month, catering to the growing needs of cancer patients in our community. This initiative reaffirms our dedication to providing holistic care and addressing critical medical needs.

Community Engagement and Outreach

As part of our ongoing community outreach efforts, Vibhaa Hospital organised a successful **Free Health Check-up Camp on March 23, 2023**. With a special focus on Liver Health, the camp aimed to promote early detection and prevention of common health issues. The overwhelming response from the community underscores the importance of such initiatives in fostering a healthier society.

In a remarkable surgical feat, **our team, led by Dr. Sirish Patil, successfully performed a challenging surgery for neck hemangioma**. Despite its unique location and extension into vital structures, the surgical intervention resulted in a successful outcome, showcasing our commitment to excellence in patient care and surgical expertise.

Upcoming Initiatives and Future Directions

Looking ahead, Vibhaa Hospital is poised to launch a **comprehensive care unit for Diabetic Foot Management**. With a focus on preventive care and limb-saving interventions, this initiative aims to address the growing incidence of diabetic foot complications and improve the quality of life for our patients.

Personal Reflections and Recommendations

On a personal note, I had the pleasure of participating in a memorable **outing to Goa with fellow members of the Indian Medical Association**. The camaraderie and exchange of ideas among esteemed colleagues were truly inspiring.

Additionally, I highly recommend the book **"Alchemy" by Rory Sutherland**, which offers valuable insights into human behaviour and the importance of embracing irrationality in decision-making.

Gratitude and Acknowledgments

I extend my heartfelt gratitude to our dedicated team, supportive colleagues, and valued patients for their unwavering trust and cooperation. **With your continued support, Vibhaa Hospital is poised to achieve greater heights in healthcare excellence and service to the community.**
