

A free health check-up camp was organized at Vibhaa Hospital in Belgaum on 29 July 2023 auspices of World Hepatitis Day, which was attended by 78 people. The initiative was greatly appreciated and received with gratitude by the attendees.

During the camp, eight patients were newly diagnosed with diabetes and hypertension. They received further treatment and education. Dr. Kishor Bandagar, a General and Laparoscopic Surgeon, examined the patients. Dr. Pratap Budhya, MD , General Physician, and Dr. Harishankar provided free consultations.

The following tests were conducted for free: Complete Blood Count, Random Blood Sugar, Liver Function Test, and ECG, which would have cost approximately INR 1600. The camp was an important event to raise awareness about hepatitis and provide free health check-ups to the community.

Regular health check-ups are important for maintaining good health. They can help detect health problems early, when they are easier to treat. Screenings for hepatitis B and C are recommended for individuals who are at high risk for infection, such as those who use intravenous drugs or have unprotected sex.

Vibhaa Hospital is committed to providing high-quality healthcare services to the community. Our health check-up camp on World Hepatitis Day was an important event to raise awareness about hepatitis and provide free health check-ups to the community. If you are looking for a hospital that cares about the health and well-being of its patients, look no further than Vibhaa Hospital.

We hope to continue organizing similar events in the future and serving the community.
