

Vibhaa Hospital- Newsletter

- *Issue: 3*
- *Date: Sep 1, 2023*

Warm greetings to all seniors, my dear colleagues, and friends!

Here comes another issue of our monthly newsletter about our mission to provide personalised healthcare to everyone.

We have had our days of triumphs, small gains, deep introspection, and of course, the delight of serving our patients and seeing them recover!

Free Health Checkup Camp 🏥

In an ongoing effort to reach out to the community, we are conducting free health check-ups camp for all those in need.

This month, on August 19, 2023, we conducted an important screening program for prostate health. Senior citizens underwent **PSA level check-ups**, which are important indicators for prostate cancer, and also received free consultations with our expert urologist, Dr. Amit Mungarwardi. This initiative was highly appreciated by the local community of senior citizens.

On August 26, we had a **free health check-up camp at Kanbargi Medical Center, Kanbargi.**

Nearly 50 people benefited from free blood tests (Complete Blood Count, Random Blood Sugar, Liver Function Tests). **Special thanks to Dr. V. B Hiremath** for providing us with the necessary arrangements for the camp. **Dr. Pratap Budhya, an internal medicine expert** from Belagavi, helped us with the treatment of patients.

Conducting such camps brings us closer to the community and gives us clarity on the needs of patients at the ground level. We will continue to strive for a greater reach in the community with the mission of providing personalized healthcare to all.

This month, we had a wide variety of patients receiving the benefits of our services. All our patients are touched by the personalized care and have wished us well for the intimate care they receive from our staff.

In the days to come, we are planning to conduct free health check-up camps in far-off places where healthcare is needed.

Upcoming Events

A **Liver Health Camp** is planned to be conducted on September 23, 2023. We wish to educate people and screen them for any liver ailments. We request everyone to join hands in this endeavor.

A **Free Health Check-up Camp is planned at Uchagaon.** The final dates would be announced soon!

Dr. Sirish Patil, MS ,a well-known head and neck surgeon, has joined our team. He performed his maiden surgery at our hospital. We welcome him to Team Vibhaa. We hope many more people will make use of his services.

On a personal note

I attended the **Oncoverse on August 12, 2023**, at Hubli - an engaging experience for learning various oncological surgeries  . The event was well-attended by surgeons across north Karnataka.

ASI Belagavi conducted its **monthly clinical meeting**  successfully on August 25, 2023. Informative talks had an audience of about 50 surgeons in Belagavi. Proud to be associated with a vibrant community of surgeons.

Tomorrow, on September 2, I am taking off to Vijayapura to meet all my undergraduate friends of **BLDE 2003 batch for a nostalgic reunion** . I am looking forward to reliving the moments after nearly 15 years of completing my MBBS. Time flies by, but learning never stops!

 The book that's keeping me engaged - [The E-Myth Revisited](#): by [Michael E. Gerber](#) - a guide for all those who want to know the nuances of running small businesses. Highly recommended.

Keep soaking in the good vibes of the month of Shravana.

Hope to see you with better memories and accomplishments to share in the next newsletter!

Keep healthy!

Dr. Kishor V Bandagar

MS, General and Laparoscopic Surgeon
